Preparation	<u>Wooden Floors</u> Remove all previous coatings. Vacuum up all dust on walls and floor and apply 1 st coat. Thin with 5% turps to aid penetration where necessary. Allow to dry and smooth with light sanding. 120 grit is suggested. At this stage it is very important to thoroughly vacuum the floor followed by a wipe with a wet rag to remove fine dust not removed by vacuuming. Apply 2 nd coat un-thinned and allow to dry. For a superior finish the floor should be lightly sanded again and cleaned as above. Apply 3 rd coat. <u>New Concrete Floors</u> Allow to cure for at least 1 month or until dry before applying FLOORBRITE.		
Caution	Use in well ventilated areas. If eye contact occurs, wash with water for at least 15 min.
